

## WORLDWIDE PRODUCTION SUPPLY FROM UPPER PALATINATE

**At Wackersdorf Innovation Park BLG provides material supply services for the international production sites of its client BMW.**

The range of services offered includes consolidation, packaging and containerization of European flows of goods using part-by-part and CKD procedures. Furthermore, BLG is responsible for container and packaging materials management, in-company transport and value added services.

The BLG team on site ships over 150 different part families to the USA, India, Egypt, Malaysia, Thailand, Brazil, Indonesia and Russia.

- Part-by-part and CKD
- Packaging optimization
- Warehousing
- Containerization
- Container management
- Plant traffic

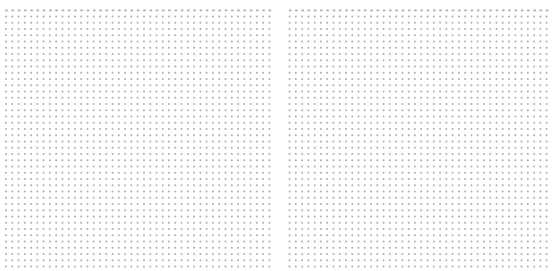

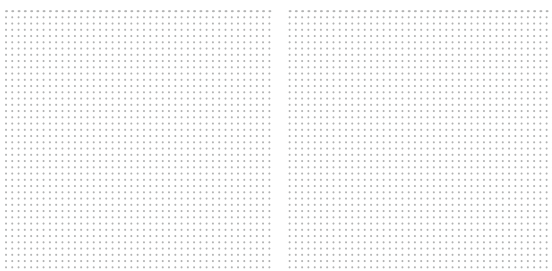

BLG stores and packs the goods delivered by suppliers on a total space of approx. 50,000 square meters.

A total annual volume of up to 600,000 cubic meters are packed and loaded on site.

The staff handles incoming goods via truck, carries out quality inspections, prepares packaging materials, repacks auto parts from reusable containers in up to 1,500 loading units per day, carries out inventories and containerizes deliveries in the outgoing goods section.
