

We actively embrace the three pillars of sustainability (ecological, economic and social responsibility)

ENVIRONMENTAL AND ENERGY POLICY

STATUS 04/2025

BLG LOGISTICS, as a seaport and logistics service provider offering an extensive portfolio in logistics services to an international network, is committed to a comprehensive environmental and energy management. Protection of the environment with a simultaneous increase in value creation is critical to our long-term success as a company.

In order to meet the requirements for climate protection, we have embarked on the „Mission Climate“ together with our employees, and our targets contribute to the Paris Agreement. In addition to the use of renewable energies, increasing energy efficiency at our sites is a key factor to achieve our ambitious climate protection targets.

We are committed to develop our environmental and energy management continuously to improve our performance constantly. In this process we ensure that the necessary financial, personnel, and technical requirements are provided when setting and pursuing our goals. We use defined key performance indicators to ensure transparent and regular reporting both internally and externally. All managers at BLG LOGISTICS are required to comply with this policy as well as enable and motivate all employees to adhere to it too.

- We are committed to protect the environment and prevent environmental pollution.
- We comply with all our binding obligations, such as internal, customer, and legal norms and requirements.
- We are committed to systematically recording and continuously reducing our energy consumption and the resulting greenhouse gas emissions as well as increasing energy efficiency.
- We take responsibility for the environmentally safe handling of resources and reduce our waste generation through avoidance, reduction, recycling, and/or reuse.
- We support the preservation of biodiversity and the protection of air and water quality.
- We are committed to environmentally conscious chemicals management by continually striving to minimize adverse environmental and health impacts and conserve resources.
- We incorporate environmental safety and energy efficiency in the procurement of products and services.
- Our Supplier Code of Conduct contractually obligates our suppliers and business partners to meet BLG LOGISTICS' environmental and social sustainability requirements.
